

Cejay/Warrior GloTape Combat ID Markers

► Cejay Engineering has been selected by Warrior GloTape as its new master distributor of Infrared Reflective (IR) combat ID markers. Cejay is a manufacturer of electronic combat identification IR marking beacons. Warrior GloTape combat ID markers glow brightly when viewed through military night vision goggles. The GloTape markers do not emit or reflect visible light. Most markers are matte black. The new Warrior GloTape IR markers include flags, blood type, squares, shims and arm bands. Also, custom IR tape can be produced for customers. **For more information, please visit www.cejayeng.com.**

Timberland PRO Valor Series with Anti-Fatigue Footbeds

► Timberland PRO® introduced its newly redesigned Timberland PRO® Valor™ series, an innovative line of lightweight footwear designed for public safety professionals. The line features dynamic Anti-Fatigue Technology, providing for extended wear and increased standing tolerance. The design includes a molded insole with an ergonomic inverted cone system that collapses and rebounds, absorbing shock while returning energy back to the foot for more strength and stamina when it's needed. **For more information, visit www.timberlandpro.com.**

Original S.W.A.T. Air M.T. Tactical

► The Air M.T. Tactical boot has always had a waterproof breathable liner and 200 grams of Thinsulate® insulation. It now has the additional feature of a non-metallic shank which is airport-friendly and provides torsional support. The Air M.T. Tactical meets ASTM F 1671-07 standards for blood-borne pathogen resistance, and the outsole meets ASTM F 489-96 test standards for slip- and oil-resistance. This boot has a gusseted 100 percent YKK® zipper with reinforced zipper stop and Velcro closure. The midsole features air cushion technology for comfort and shock absorption. **For more information, visit www.originalswat.com.**

LaserMax MantaRail Momentary Switch Control System

► LaserMax Inc. has added a product to its line of accessories for the Uni-Max red and green laser sighting systems equipped with momentary activation switches (MAS). The MantaRail simply houses your pressure pad in a flexible sheath that clamps tightly to the rail. The provided MantaClips discretely organize the excess cord to prevent tangling and snagging. This accessory adds virtually no weight to your firearm. It is designed for use with LaserMax's existing momentary activation switch accessories and is adaptable to the shooter's desired location on the rifle. It can be removed for cleaning of the weapon and re-mounted in less than a minute. **For more information, visit www.lasermx.com.**

BLACKHAWK! Fire/EMS Station Wear Pants

► BLACKHAWK! Products Group™ enters the Fire/EMS market with BLACKHAWK! Station Wear. Made from 8.5 ounce, 100 percent cotton canvas, the Station Wear Pants are reinforced in the most hard-wearing areas with a gusseted crotch, double layer seat and interior knee pad pockets (knee pads sold separately). The pockets are capable of holding knives, pens, radios and tools. The waistband expands during increased movement, while a silicone grip strip keeps the shirt tucked in while moving. The Station Wear Pants also feature a reflective tape placed within the leg's out seam which runs from waistband to cuff. **For more information, visit www.blackhawk.com.**
