

MARINE IFF BUTTON-ON MARKER.

The Marine IFF Button-ON marker, utilizes a 2"x2" specially-formulated reflective patch that only reflects infrared (IR) wavelengths when illuminated by light sources such as targeting lasers. When viewed with military night vision IR systems, the reflected IR light provides a simple marking method that identifies friendly persons to team members at distances up to 800 meters.

The Marine IFF Button-ON Marker is supplied on OD Green or Tan CORDURA® fabric backing and can be fastened to the shoulder pockets buttons or the breast pockets buttons of the US Marine combat utility uniform. The Marine IFF Button-ON Marker is a durable and easy to use IFF solution. Each Marker kit contains two markers, one for each shoulder or breast pocket.

Two versions of the Marine IFF Button-ON Marker are available. The traditional Marker, where the infrared reflective patch is Sewn-ON to the fabric backing and the Velcro® Marine IFF Button-ON Marker where the

infrared reflective patch is attached with hook and loop Velcro® allowing for easy replacement of the 2" x 2" reflective patch on the battlefield. The Velcro Marker provides a lower cost solution over a deployment, since only the reflective patch would need to be replaced, rather than replacing the complete Button-ON Marker.

All materials are US Made and Berry Compliant. US Marine Approved.

Weight (<i>Marine IFF Button-ON Marker</i>)	0.2 Ounces 6 Grams
Weight (<i>Velcro® Marine IFF Button-ON Marker</i>)	0.4 Ounces 11 Grams
Size	5.0" x 3" 127mm x 76 mm
