

WARRIOR GLOTAPE-IR REFLECTIVE MARKERS

Warrior GloTape Infrared (IR) Reflective Markers and Tapes are manufactured from specially-formulated material that only reflects infrared (IR) wavelengths when illuminated by light sources such as targeting lasers for covert marking of troops. When viewed with military night vision IR systems, the reflected IR light provides a simple marking method that identifies friendly persons to team members at distances up to 800 meters. To the naked eye, GloTape appears to be similar to black duct tape in both texture and finish. Available with Velcro hook, or peel-and-stick backing

WARRIOR GLOTAPE-IR REFLECTIVE SCHIMS

Warrior GloTape Subdued Infrared (IR) Reflective Schims are ideal for adding combat Identification markers to the helmet. Designed to fit into the helmet covers button inserts, the helmet schim features a limited field of IR reflection so IR light is only reflected back to the viewer in a 5 degree cone from center minimizing unwanted detection. When viewed with military night vision IR systems, the reflected IR light provides a simple marking method that identifies friendly persons to team members at distances up to 800 meters.
